

EMAS DINAMIK (828558-V)

ENVIRONMENT PROTECTION POLICY

EDSB goal is to operate responsibly and minimize the environmental impact of our activities both onshore and offshore by preventing pollution and efficiently utilize resources.

To manage these objectives, it is our policy to:

1. Implement EDSB Safety Management System (SMS).
2. Demonstrate clear commitment of senior management and personnel in
3. compliance to the SMS.
4. Understand current and future environmental requirements.
5. Fully comply with, or exceed, all applicable environmental legislations, rules and regulations nationally and globally.
6. Prepare for a quick and efficient response in case of pollution.
7. Consider impact to Environment as top priority in our business decisions.
8. Promote environmental-friendly technologies, materials, goods and services within the Company.
9. EDSB will search for a continual improvement within its environmental objectives and will have a continuous focus on improved fuel efficiency and reduce emissions to air.
10. Encourage participation throughout the organization to identify where we may improve our practices and achieved our Environmental Goals.
